

STACKLY FINE DINING RESTAURANT WEBSITE

Technical Documentation

Prepared By: Dhamodharan P

Project Type: Responsive Fine Dining Restaurant Website

Architecture: Static Multi-Page Frontend with Customer and Admin Dashboards

Version: 1.0

Documentation Date: August 2026

1. Project Overview

1.1 Project Description

Stackly Fine Dining Restaurant Website is a responsive restaurant management and promotional website developed using HTML5, CSS3, and JavaScript. The platform enables visitors to explore the restaurant, browse menus and chef specials, view the gallery, make table reservations, purchase restaurant products, read blogs, and contact the restaurant.

The project also provides dedicated Customer and Admin dashboards to demonstrate restaurant management features such as reservations, customer profiles, menu management, and administrative controls.

The application follows a lightweight modular frontend architecture with reusable UI components, responsive layouts, and interactive JavaScript functionality. It is optimized for desktop, tablet, and mobile devices.

1.2 Project Objectives

- Develop a professional fine dining restaurant website.
 - Showcase restaurant menus and chef specials.
 - Provide an online table reservation system.
 - Display restaurant gallery and team members.
 - Support customer authentication.
 - Maintain separate Customer and Admin dashboards.
 - Ensure responsive layouts for desktop, tablet, and mobile devices.
 - Deploy the website using GitHub Pages.
-

2. Technology Stack

Frontend Technologies

- HTML5 Semantic Markup
- CSS3
- CSS Variables
- Flexbox
- CSS Grid
- Media Queries
- JavaScript ES6
- DOM Manipulation
- Event Handling

Design Assets

- Restaurant Images
- Food Photography
- SVG Icons
- Logo Assets
- Gallery Images
- Banner Images

Development & Deployment

- Git
- GitHub
- GitHub Pages

3. Project Structure

```
Fine Dining Restaurant Website/
```

```
|— index.html  
|— about.html  
|— menu.html  
|— specials.html  
|— shop.html  
|— reservation.html  
|— gallery.html  
|— team.html
```

```
|— blog.html
|— contact.html
|— login.html
|— signup.html
|— customer-dashboard.html
|— admin-dashboard.html
|— 404.html
|
|— assets/
|   |— css/
|   |— js/
|   |— images/
|   |— icons/
|   |— logo/
|
|— README.md
```

3.1 File Responsibility

File	Responsibility
index.html	Restaurant Home Page
about.html	Restaurant Information
menu.html	Food & Beverage Menu
specials.html	Chef's Special Dishes
shop.html	Online Restaurant Store
reservation.html	Table Reservation
gallery.html	Restaurant Gallery
team.html	Chef & Staff Profiles
blog.html	Restaurant Blog
contact.html	Contact Information

login.html	Customer Login
signup.html	Customer Registration
customer-dashboard.html	Customer Dashboard
admin-dashboard.html	Admin Dashboard
404.html	Error Page
assets/css	Website Styles
assets/js	Website Scripts
assets/images	Images & Graphics

4. Public Website Pages

Home Page

Features

- Hero Banner
- Featured Dishes
- Restaurant Introduction
- Popular Menu Items
- Customer Testimonials
- Reservation Call-to-Action
- Latest News
- Footer

About Page

Displays

- Restaurant History
- Mission
- Vision
- Dining Experience

- Awards & Achievements
-

Menu Page

Displays

- Starters
 - Main Courses
 - Desserts
 - Beverages
 - Signature Dishes
 - Menu Categories
-

Specials Page

Displays

- Chef's Specials
 - Seasonal Menu
 - Premium Dishes
 - Limited-Time Offers
-

Shop Page

Displays

- Restaurant Products
 - Gift Cards
 - Merchandise
 - Specialty Foods
 - Beverages
-

Reservation Page

Contains

- Reservation Form
 - Guest Information
 - Reservation Date
 - Reservation Time
 - Table Booking Confirmation
-

Gallery Page

Displays

- Restaurant Interior
 - Dining Experience
 - Food Gallery
 - Events
 - Chef Gallery
-

Team Page

Displays

- Executive Chef
 - Restaurant Staff
 - Kitchen Team
 - Management Team
-

Blog Page

Displays

- Culinary Articles
 - Food Recipes
 - Restaurant News
 - Cooking Tips
-

Contact Page

Contains

- Contact Form
 - Restaurant Address
 - Phone Number
 - Email Address
 - Business Hours
 - Google Map
-

5. Authentication Module

Login

Features

- Email Validation
 - Password Validation
 - Customer Authentication
 - Dashboard Navigation
-

Registration

Features

- Full Name
 - Email Address
 - Phone Number
 - Password
 - Confirm Password
-

Validation Rules

Field	Validation
Name	Required
Email	Valid Email Format
Phone	Required
Password	Required
Confirm Password	Must Match Password

6. Dashboard Architecture

The application includes dedicated Customer and Admin dashboards using reusable frontend components.

Customer Dashboard

Features

- Dashboard Overview
 - Reservation History
 - My Orders
 - Wishlist
 - Profile Management
 - Notifications
 - Settings
-

Admin Dashboard

Features

- Dashboard Overview
 - Reservation Management
 - Menu Management
 - Customer Management
 - Product Management
 - Reports & Analytics
 - Website Settings
-

7. Dashboard UI System

Customer Dashboard

- Sidebar Navigation
 - Reservation Cards
 - Order Summary
 - Profile Section
 - Notification Center
-

Admin Dashboard

- Statistics Cards
 - Reservation Tables
 - Menu Management
 - Customer Records
 - Analytics Dashboard
 - Administrative Controls
-

8. Responsive Design

Desktop

- Sticky Navigation
 - Multi-column Layout
 - Dashboard Sidebar
 - Large Hero Banner
-

Tablet

- Responsive Grid Layout
 - Collapsible Navigation
 - Adaptive Dashboard
 - Flexible Reservation Form
-

Mobile

- Hamburger Navigation
 - Single-column Layout
 - Responsive Cards
 - Mobile Reservation Interface
 - Touch-Friendly Controls
-

Primary Breakpoints

- 1200px
 - 992px
 - 768px
 - 576px
-

9. JavaScript Modules and Interaction Flow

Module	Purpose
Navigation	Responsive Navigation
Authentication	Login & Registration

Menu	Food Menu Display
Reservation	Table Reservation
Shop	Product Display
Gallery	Gallery Rendering
Dashboard	Dashboard Components
Contact	Contact Form Validation
Application	Website Initialization

Application Initialization

```
document.addEventListener("DOMContentLoaded", () => {

    initializeNavigation();

    initializeAuthentication();

    initializeMenu();

    initializeReservations();

    initializeDashboard();

    initializeContactForm();

});
```

10. UI / UX Features

Brand Identity

- Premium Fine Dining Theme
- Elegant Color Palette
- Modern Typography

- High-Quality Food Photography
 - Luxury User Interface
-

Interactive Features

- Smooth Scrolling
 - Responsive Navigation
 - Reservation Form
 - Menu Filtering
 - Image Gallery
 - Product Cards
 - Hover Animations
 - Dashboard Widgets
-

Accessibility

- Semantic HTML5
 - Keyboard Navigation
 - Alternative Text for Images
 - Accessible Forms
 - Responsive Interface
-

11. Performance and Asset Strategy

- Optimized Restaurant Images
- Shared CSS Stylesheets
- Modular JavaScript
- Lightweight Frontend Architecture
- Fast Page Loading

Recommended Optimizations

- Lazy Loading Images
 - CSS Minification
 - JavaScript Minification
 - Browser Caching
 - Image Compression
 - CDN Integration
-

12. Browser Compatibility

Browser	Support
Google Chrome	Yes
Microsoft Edge	Yes
Mozilla Firefox	Yes
Apple Safari	Yes
Mobile Chrome	Yes
Mobile Safari	Yes

13. Deployment Process

Git Commands

```
git add .  
  
git commit -m "Project Update"  
  
git push origin main
```

Deployment

- GitHub Repository
- GitHub Pages

Local Preview

```
python -m http.server 5500
```

Open:

```
http://127.0.0.1:5500
```

14. Testing Summary

Functional Testing

- Website Navigation
 - Menu Browsing
 - Reservation System
 - Restaurant Shop
 - Gallery
 - Authentication
 - Customer Dashboard
 - Admin Dashboard
 - Contact Form
-

Responsive Testing

- Desktop
 - Tablet
 - Mobile
-

Technical Validation

- HTML Validation
 - CSS Validation
 - JavaScript Validation
 - Asset Verification
 - Cross-Browser Compatibility
-

15. Security and Production Limitations

- Client-side authentication is used for demonstration purposes.
- No backend database integration.
- Reservation and order information is stored locally.
- Contact form requires server-side processing.
- Dashboard information uses static demonstration data.

Production Requirements

- RESTful Backend API
- Secure Database
- JWT Authentication

- Reservation Management System
 - Online Payment Gateway
 - Email & SMS Notifications
 - Server-side Validation
 - Role-based Authorization
 - SSL/TLS Encryption
-

16. Developer Information

Project Name: Stackly Fine Dining Restaurant Website

Developer: Dhamodharan P

Role: Frontend Developer

Technologies: HTML5, CSS3, JavaScript ES6

Deployment: GitHub Pages

Project Version: 1.0

Document Version: 1.0
